Description:

The “Cascada” sofa was inspired by pristine mountain waterfalls. The purpose of the design is to engage light and shadow in a never-ending game by providing an interesting playground of changing surfaces, volumes, voids, and materials. The sofa has several different modules and is suitable for reception areas and modern home interiors.

Key features:

- multipurpose armrests which can be used as extra seats or as tabletop surfaces
- removable upholstery covers on all modules
- improved seat ergonomics
- dismountable sofa modules – can be broken down into 6 basic components
